

RENTAL SOLUTIONS

Choose Babcock Wanson Rental
to ensure the continuity of your production

**Babcock
Wanson**
Rental

Babcock Wanson Rental is a rental service offered by Babcock Wanson, renowned for its technological innovations and superior service particularly in the fields of industrial boilers water treatment, air treatment, and VOC and odor treatment. and odor treatment.

Thanks to the group's qualities and strengths, Babcock Wanson Rental has become a leader in the rental of mobile thermal equipment for industry.

Babcock Wanson is positioned as the equipment supplier to major industry players, engineering firms, and installers.

As a long-standing partner of the process industries, Babcock Wanson Rental is able to offer you equipment tailored to your needs, whether they are:

- **Short-term or seasonal**
- **Related to work on existing equipment,**
- **Due to temporary unavailability for maintenance**
- **Caused by unexpected shutdowns, or in response to a financial need**

BOILER ROOM EXPERTISE TO ENSURE CONTINUITY OF PRODUCTION

Your needs

The supply of energy and utility to the process is essential to the industrial world. The availability of these equipment is crucial

However, you may be faced with several situations in which you may need to resort to a temporary solution.

However, any manufacturer may face:

- Occasional or seasonal needs
- Boiler room work
- Downtime for periodic maintenance;
- The need to install emergency equipment;
- Any unforeseen event affecting its business.

Our solutions

Whatever your sector of activity, Babcock Wanson offers the appropriate rental solution to ensure your production continuity.

Our teams will bring you all their expertise in in the steam and energy sectors, to offer you a technical and commercial solution tailored to your needs within the timeframe required by your process.

According to your needs, they will provide:

- | | |
|---|---|
| • Commissioning | • Staff training |
| • On-call with response response times 24/7 | • Supply and/or fuel management (heating oil) |
| • Operating | • Supply of spare parts |
| • Rental equipment maintenance | |

A COMPLETE SOLUTION AND TAYLORED SERVICES

Babcock Wanson offers short, medium and long-term turnkey rental solutions. With a wide range of equipment (steam, hot water, superheated water, thermal fluid, water treatment, etc.), Babcock Wanson Rental can also provide you with a wide range of associated services (installation, on-call service, maintenance, follow-up, commissioning, operation, etc.), which will simplify your process and utilities management

WHY RENTING?

WHY CHOOSE BABCOCK WANSON RENTAL?

Flexibility

A fleet unique in France

- it is composed of over 200 pieces of equipment (boilers and complete boiler rooms) ranging from 90 to over 13,5 MW, providing steam, hot water, superheated water and thermal fluids, over a wide pressure range.
- Our extensive technical sales network enables us to respond to a large number of projects simultaneously throughout France and in all the countries covered by the Babcock Wanson Group network.
- Its action also extends beyond the perimeter of the boiler room, offering a wide range of equipments, including water treatment, degassing covers, deaerators, bursting pots, etc.

Responsiveness

A dedicated organisation and flawless logistics

- A network of more than 150 technicians, 10 regional agencies in France that provide boiler commissioning and technical assistance.
- The resources and skills in logistics, transport and handling of a major boiler manufacturer.

Reliability

Quality equipment

- The assurance of a perfect match between the heating element and the burner.
- Boilers complying with European standards, with excellent energy and environmental performance, revamped or reconditioned, factory-tested before shipment and inspected by an authorized organization.
- New boilers specially built each year and integrated into the fleet to keep it constantly up to date.

Experience and Expertise

The guarantee of benefiting from

- The cumulative experience of leading boiler manufacturers such as Babcock Wanson, Parent, Lardet, SEUM, Goémine, Cobra...
- The expertise of Europe's N°1 industrial boiler rental in Europe, with over 1,000 references in all areas of industry: refineries, chemicals, petrochemicals, sugar mills, food processing, paper mills, civil nuclear power...

THE BABCOCK WANSON GUARANTEE

Wide range of equipment

Attractive prices

Immediate availability

Maintenance contract

After-sales service

Work on existing boilers (periodic requalification, scheduled maintenance, major shutdowns, etc.)

Occasional or seasonal needs

Breakage and repairs

Product development

Interim during the manufacture of new equipment

Long-term rental in existing boiler rooms or outdoors in containers

OUR BOILERS

FIRE TUBE BOILERS \leq 4 t/h

- Steam output from 200 kg/h to 4 t/h
- Pressure: 15 to 30 bar
- Fuel: Natural Gas or FOD
- Container includes feedwater tank, softener, dosing pump, and drain bursting chamber

QUICK STEAM BOILERS

- Steam Output from 300 kg/h to 5 t/h
- Pressure: 12 bars
- Fuel: Natural gas, FOD or electric
- Avec coffret électrique et protection intempéries

FIRETUBE BOILERS \geq 4 t/h

- Steam Output: 4 t/h to 20 t/h
- Pressure: from 15 to 30 bars
- Fuel: Natural Gas / FOD
- Includes access platform, external boiler room box, technical shelter, gas pressure regulation valve

HOT WATER BOILERS

- Output from 150 kW to 10,000 kW
- Fuel: Natural gas, FOD or electric
- With expansion vessel, backflow preventer, stainless steel heat exchanger, primary and secondary circulators, 3-way valve
- Containerised solution up to 3 MW

THERMAL FLUID SOLUTIONS

THERMAL FLUID BOILERS

- Output 500 kW to 3500 kW
- Fuel: Natural gas / FOD
- With electrical control panel, weatherproof protection
- Options: circulation pump, expansion vessel, deaerator, tank

FIRED STEAM SUPERHEATERS

- Power Output from 150 kW to 3000 kW
- Fuel: Natural gas, FOD or electric
- Includes electrical control box, weather protection, and steam separator.

OIL TANKS

- Capacity: 2.5 to 70 m³
- With gauge, fill limiter, double wall or retention, dip tube, fire-fighting filling connection, manual priming pump

WATER TREATMENT

- Heated feed water tank
- Purge bursting pot
- Softeners
- Dosing pump for chemical injection
- Or in container with osmosis unit and softener
- Flow rate up to 40 m³/h

FEED TANKS

- Capacity: 1 to 24 m³
- Steel or stainless steel
- With steam reheating
- Level management

ACCESSORIES

- Gas or steam expansion skid
- Flowmeters
- Hoses
- Silencers
- Overflow valves
